## Message from the President

The annual Career Talk on 2020/21 Hospital Authority Resident Training Programme co-organised by the Hong Kong Academy of Medicine (HKAM) and the Hospital Authority (HA) took place on Saturday, 9 November 2019 at the Hospital Authority Head Office Building. The talk began with the highlights of the 2020/21 Centrally-coordinated Recruitment Exercise for Resident Trainees, delivered by Dr. Sharon Wong, Chief Manager (Medical Grade) of HA Head Office. Then, it was closely followed by an Introduction on Postgraduate Specialist Training delivered by Prof. Gilberto Leung, Vice President (Education & Examinations) of HKAM. And there were information booths hosted by representatives from different specialties opened for interns' enquires. Many thanks to Dr. Edmond Chan, Dr. Alfred Kwong, and Dr. MK Lee for joining me to host the Family Medicine booth. There were HKCFP video recordings, publications, and pamphlets on display, and they were made available for participants to take home. Interns visited our booth enquiring about the training contents and duration, the latest development of Family Medicine, primary healthcare, and the future career pathway as a Family Physician, and last but not least the number of available training posts. We were most delighted that a lot of interns had expressed interests in considering Family Medicine as a career choice. I look forward to meeting them again soon during the forthcoming recruitment exercise for Family Medicine resident trainees.

We were most honoured to have the opportunity to co-organise this year's Hong Kong Primary Health Care Conference (HKPCC) with the Hong Kong Academy of Medicine. It was unfortunate that the Academy of Medicine of Malaysia (AMM) and the Academy of Medicine, Singapore could not join us as

HKAM Conference & HKPCC 2019 Ribbon Cutting Ceremony

Dr. David Chao, Dr. Donald Li and Dr. Angus Chan

originally planned. The Conference was renamed as The Hong Kong Academy of Medicine Conference and the Hong Kong Primary Care Conference 2019. The joint Conference was successfully held on 6 – 8 December 2019 with the tremendous support from all the participants and guests, amounting to nearly 600 strong. The theme was "People-Centred Care: Towards Value-Based Innovations". As the title implied, the conference aimed at addressing the future directions of healthcare improvement and development in provision of patient-oriented clinical care. The scientific programme of the Conference encompassed a wide range of clinical practice situations. The clinical symposia covered topics from acute to chronic conditions and from artificial intelligence in healthcare to voluntary health insurance. Mr. Ricky MK Chu, Chairman of Equal Opportunities Commission, Hong Kong, delivered the Halnan Lecture titled, "Knocking Down Barriers to Inclusive Healthcare". Dr. Donald Li, President of World Organisation of Family Doctors (WONCA), shared with us the concepts behind the setting up of District Health

(Continued from page 1)

Welcome Remarks by the President of HKCFP, Dr. David Chao

Centres (DHCs) and the challenges on how DHCs could help fulfil the delivery of comprehensive healthcare needs to the people and community in Hong Kong in the plenary session titled, "Enhancing Primary Care in Hong Kong through the Provision of Integrated People-Centred Primary Care in District Health Centres". We must also express our appreciation towards Prof. Doris Young, Division of Family Medicine, National University of Singapore, for her unflinching support and sharing with

us during the HKPCCs over the years. The Conference was indeed a valuable opportunity for healthcare experts and practitioners from different specialties across the healthcare sectors to share their experiences and insights. I would like to express my heartfelt gratitude to the Organising Committee, Scientific Subcommittee and the Conference Secretariat for their hard work and contributions in planning and arranging such an inspiring platform for exchange.

While the Year 2019 is about to end, the new Year 2020 is around the corner. As a sneak preview of 2020, I would like to share with you that the WONCA Asia Pacific Region Conference 2020 is going to be held in Auckland, New Zealand from 23 - 26 April 2020. Abstracts are now open for submission. Plan your trip and register to the Conference early so as to enjoy the early bird discounts which are open till 20 December 2019.

Wishing you a Merry Christmas and a Happy New Year ahead!

**Dr. David V K CHAO**  
President

香 港 大 學  
THE UNIVERSITY OF HONG KONG

**Clinical Assistant Professor  
in the Department of Family Medicine and Primary Care  
(Ref.: 499125)**

Applications are invited for appointment as **Clinical Assistant Professor in the Department of Family Medicine and Primary Care** (Ref.: 499125), to commence as soon as possible, on a four-year fixed-term basis, with the possibility of renewal.

The Department of Family Medicine and Primary Care aims to produce doctors to practise medicine of the highest standard and in the best interests of their patients and the community, and to inspire them to strive for and achieve academic excellence. It is the mission of the Department to promote quality primary care through education, patient-centred service and research in family medicine.

Applicants should possess a medical degree registrable with the Medical Council of Hong Kong, and preferably a higher qualification in general practice/family medicine. Special consideration will be given to holders of the F.H.K.A.M. (Family Medicine) or equivalent specialist qualifications in general practice/family medicine. They should have proven capacity and potential in research; demonstrate a strong commitment to excellence in clinical services and training; and have experience in undergraduate teaching. They should also be fluent in Cantonese and English (including Putonghua), although teaching, research and professional activities are conducted in English. The appointee is expected to participate in the planning and delivery of undergraduate and postgraduate programmes in Family Medicine; conduct research; develop and provide clinical services in primary care in the Department and the HKU-Shenzhen Hospital; and contribute to administrative duties in the Department and the Faculty. Information about the post can be obtained from Professor Cindy Lam at [cklam@hku.hk](mailto:cklam@hku.hk).

A highly competitive salary commensurate with qualifications and experience will be offered, in addition to annual leave and medical benefits. At current rates, salaries tax does not exceed 15% of gross income. The appointment will attract a contract-end gratuity and University contribution to a retirement benefits scheme, totalling up to 15% of basic salary. A monthly cash allowance will be offered to the successful candidate. Housing benefits will also be provided as applicable.

The University only accepts online application for the above post. Applicants should apply online at the University's career site (<https://jobs.hku.hk>) and upload an up-to-date C.V. Review of applications will start on January 2, 2020 and continue until **January 31, 2020** or until the post is filled, whichever is earlier.

*The University is an equal opportunities employer  
and is committed to equality, ethics, inclusivity, diversity and transparency*

## GP19 Adelaide

Dr. Chan Kam Sum, Dr. Siu Pui Yi and Dr. David Chao  
Department of Family Medicine and Primary Health Care, Kowloon East Cluster, Hospital Authority

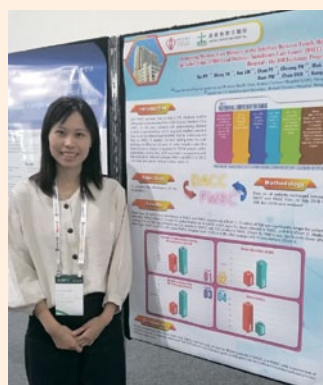

Adelaide Convention Centre

GP19 was a memorable, eye-opening trip, and for some, the first overseas conference and the first opportunity to set foot on the Australasia continent. We were proud to bring along 4 posters from our cluster to present during the conference.

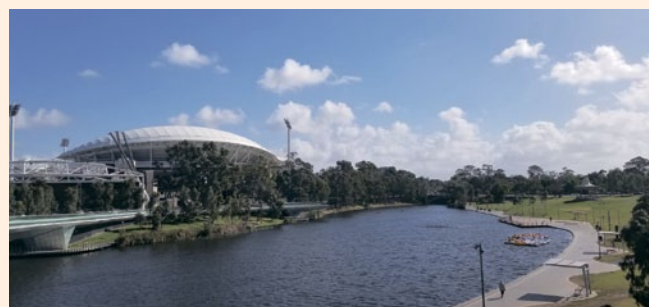

Dr. Chan Kam Sum and her Poster

Dr. Siu Pui Yi and her poster

The conference took place in Adelaide, a mid-sized cosmopolitan city with rich cultural background, slightly less buzzing and crowded than big cities like Sydney and Melbourne. The venue was held in a large modern convention centre surrounded by rivers, greenery and historical buildings, a luxury deemed in a space-constrained Hong Kong, all of which made it a more peaceful and conducive environment for learning. The organiser had an app which attendees could select beforehand the presentation they would like to attend and form a personal agenda for easier reference. There

were plenty guides and signage around to prevent one from getting lost.

Riverbank and Adelaide Oval

The conference had a wide variety of workshop, plenary and presentation topics, ranging from internal medicine, geriatrics, paediatrics, gynaecology, CPR, medico-legal, administrative issues, well-being of GPs and many more. It is interesting to note that every session started with an acknowledgement of the land, to pay respect to the local aboriginal. They even invited an aboriginal to kick start their convention by performing the didgeridoo (a large wind instrument). The conference started early, including a morning Tai Chi session held at 6am and breakfast presentations held at 7am (which we attended given the close proximity of our hotel). The sessions were well paced and spaced, with tea breaks in between, preventing the attendees from feeling too dragged and drained. It was fun to note that there were fruit baskets replenished daily during the conference where the

attendees could grab along an apple or a pear. Some exhibitors offered fruit shakes, ice cream or coffee at the booth, which added some perks to the refreshment.

Fresh fruits at Central Market

Despite a handful of the speakers had to declare their conflict of interest, fortunately, did not seem to favor their presentation towards their sponsors. The local attendees were very active in raising their queries and thoughts during the interactive sessions, much unlike the culture back in Hong Kong where people tend to be more afraid of drawing

any form of extra attention. We encountered GPs and researchers in the area of posters presentation, and were delighted to learn the differences in health care systems and exchanged views on disease management.

The GPs in Australia have to deal with a vast variety of clinical problems within their own clinics independently as the specialists are usually located quite distantly, especially in the rural areas. They often need to be equipped with more practical skills given it is often a one-man-band situation. Many are entrusted by the long and close relationship with their patients as a family physician down the road. Their style of handling issues seems to be more patient-centred rather than disease oriented. Having never worked or lived in Australia, one has no idea whether this is the genuine and norm of the general practice situation or it is just an idealistic standard as envisioned by the lecturer.

The priority of disease spectrum and treatment concerns differs a little between Australia and Hong Kong probably due to the different ethnicity. For example, one is concerned of the risk of venous thrombosis with hormonal replacement therapy, the risk of increased migraine with oral contraceptive pills and the possibility of cystic fibrosis in a chronic coughing child. The dermatology lecture focused a great deal on skin cancer which is very common in Australia. Most of the local doctors were well trained on the aspects of skin cancer, probably due to the high occurrence of those entities in Australia. Yet we were surprised to see that hardly anyone use umbrella or sunshades around despite the scorching sun.

The Australian government also implements many schemes like those of Hong Kong, such as schemes involving cervical cancer screening, colorectal cancer

screening and made accessible to the GPs by ordering test kit from the government. The medical infrastructure and support service sector are much more diversified and flourishing in Australia than Hong Kong (or so it seems given much less similar exhibitors in a Hong Kong convention) probably because a significant proportion of our doctors work in the public sector or are shadowed in medical healthcare chain. However they are also facing the constraint of limited time in consultation and restricted list of subsidised drugs covered by the government formulary.

One of the most worth mentioning session during the convention was on the Voluntary Assisted Dying Act in Victoria, which had an 18-month implementation period and came into effect in June 2019. Lawyer, TV host, GPs of local and European background and palliative care physicians were invited to discuss the issue. It was highly engaging and participated session, invited many questions from the floor. One can see the fear and doubt the GPs foresaw when handling such a debatable and humanitarian issue. There were already hurdles to overcome during the initial phase of implementation, such as a long waiting time to be signed up as a recognised GP for the scheme and the myriad of hard to understand online courses. There were also grey areas when enacting the actual law such as how to define a patient having a request for assisted death. Furthermore, the patient must be deemed to have decision making capacity before being allowed to be enlisted into the scheme, which excluded a large proportion of those patients with debilitating diseases and usually limited quality of life with disease progression, such as dementia and Parkinson's disease. There were also issues on whether it would result in elderly abuse and circumstances where a doctor would unknowingly commit a criminal offense during the procedure. Some attendees were totally against the act while some questioned whether the patient's choice was due to a lack of quality palliative care. The issue drawn a lot of attention partly because other states in Australia were currently discussing on enforcing a similar law.

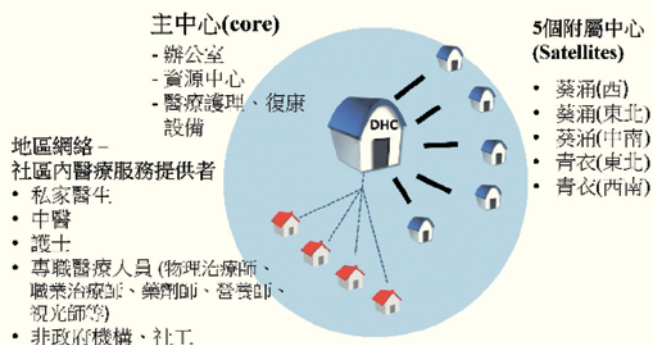

There were many more enlightening and practical sessions on menopause, eczema, chronic cough and abdominal pain in paediatrics which could not be elaborated here.

All in all, GP19 was a fruitful and enjoyable journey to go through. A short break and a breath of fresh air away from the high tension and stressed environment in Hong Kong. Our greatest gratitude goes to the department for letting us having this opportunity.

## A step towards a sustainable primary healthcare system: knowing more about District Health Centre (DHC)

The Kwai Tsing District Health Centre (DHC), the first DHC in Hong Kong was officially opened in September 2019. It marked a developmental milestone of a sustainable local primary healthcare system.

Located in Kwai Hing, the catchment area of Hospital Authority's Kowloon West Cluster, the core centre of DHC consisted of 1,500 square metres of net operating floor area, staffed with a multi-disciplinary healthcare team to provide government subsidized primary healthcare services including health promotion, health assessment, chronic disease management and community rehabilitation. In addition to the core centre, the DHC is shaping into a district primary healthcare hub supplemented by sub-district satellite centres providing multiple access and service points.

Apart from services provided within the core and satellite centres, the DHC operator would purchase private healthcare services from the district to form a DHC network. The comprehensive network included medical consultation, Chinese medicine consultation, physiotherapy, occupational therapy, dietetics, optometry, podiatry and speech therapy.

The DHC logo, to be adopted in DHCs across all 18 districts, consists of a dot in the centre and three crescents symbolizing three tiers of person-centred primary healthcare services of the DHC. The outer crescent represents primary prevention for the healthy general public, the middle crescent signals secondary prevention for individuals at high health risk, and the inner crescent refers to tertiary prevention for patients with chronic diseases. The three crescents also represents three key values of the DHC, namely, "district-based", "public-private partnership" and "medical-social collaboration". As Family Physicians, let's explore more about our first DHC!

### Service location:

- Core centre: 30/F, Tower II, Kowloon Commerce Centre, Kwai Chung
- Five satellite centres in Kwai Chung and Tsing Yi: to be commenced in phases from 2020 onwards

# 冬日玩轉關西之旅

Dr. John-Hugh Tam

某年冬天，我在日本關西地區打了一個轉（一星期的假期）。

高野山：標高900公尺的高野山為1200年前，以謚號弘法大師而聞名的高僧空海(774-835)開創真言宗之地。於漫山的寺廟小路中漫步，令心靈於忙碌的工作中平靜下來。

和歌山市：淡嶋神社最有名的是它的「雛流」儀式。每年的3月3日女兒節，神社會將雛人偶放在木舟上隨水漂流到海中，來為女兒們的幸福、成長祈福。此外，萬勿錯過附近的黑潮市場每日下午三時的鮪魚解體表演。

白濱：水清沙幼的海灘，於寒冷的冬天是旅遊淡季，遊人較少。特別推介名列「日本夕陽百選」之一的圓月島日落。

水音王子的紀念碑

自稱是「全世界最大」的鳥居

終點：熊野本宮大社

熊野古道：古代為皇室的參拜道路，古道中的神社被稱為「熊野九十九王子」，是為了連接人們參拜熊野禦子神的艱苦的信仰之道而建立的。經歷最後的「王子」後會到達熊野那智大社和那智御瀧。相傳喝了御瀧的神水可延年益壽。

那智御瀧，相傳喝下它的「神水」可延長壽命

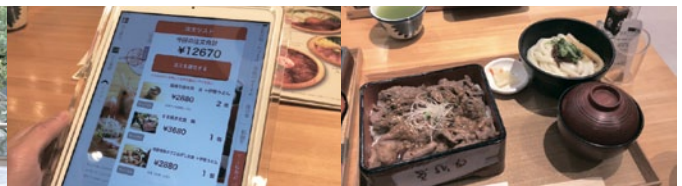

熊野三山中到處可見這隻三隻腳的烏鴉，牠的名字是八咫烏（やたがらす），在熊野地區被視為神明的使者。心水清的足球迷們也應曾在日本隊的隊徽上見過牠。

伊勢：位於三重縣的伊勢神宮，被定為神社本廳之本宗。特別推介附近餐廳的松阪牛（日本三大和牛之一）。

名花之里：每年冬天，三重縣的日本最大燈海「名花之里」就絕對不能錯過！

伊賀：伊賀是忍者和著名日本俳諧師（詩聖）松尾芭蕉的故鄉。喜歡親親大自然的的朋友，亦可考慮到附近的赤目四十八瀧一遊。

## The HKCFP Award for the Best Research of 2019

The Research Committee of the Hong Kong College of Family Physicians is calling for The Award for The Best Research of the Year 2019. All members and fellows of the College are invited to participate and submit their research papers to the Research Committee for selection. The Award will be presented at the Conferment Ceremony in 2020.

**Entry and assessment criteria are listed below:**

### **Entry Criteria:**

- 1. The principal investigator has to be a Member or a Fellow of the Hong Kong College of Family Physicians.*
- 2. The research must be original work of the investigator(s).*
- 3. The research should be conducted in Hong Kong.*
- 4. The research must have been completed.*
- 5. The paper should be presented under the standard headings of Abstract, Introduction, Methodology, Results, Discussion and Conclusion. References should be listed in full at the end in Vancouver format.*

### **Assessment Criteria:**

- 1. How relevant are the topic and findings to Family Medicine?*
- 2. How original is the research?*
- 3. How well is the research designed?*
- 4. How well are the results analyzed and presented?*
- 5. How appropriate are the discussion and conclusion(s) drawn?*
- 6. How useful are the results for patient care in the discipline of Family Medicine?*
- 7. How much effort is required to complete the research study?*

Each research project submitted will be assessed according to the seven criteria listed above by a selection panel. Each criterion may attract a different weighting to be decided by the selection panel. Please send your submission either:

**By post** to Research Committee, HKCFP, Rm 803-4, 8/F, HKAM Jockey Club Building,
