

# Clinical Competency Rubric of HKCFP

# Contents

1. Communication and consultation skills	1
2. Clinical information gathering and interpretation	4
3. Diagnosis, decision-making and reasoning	7
4. Clinical management and therapeutic reasoning	9
5. Preventive and population health	11
6. Professionalism	13
7. Family medicine practice systems and regulatory requirements	17
8. Procedural skills	20
9. Managing uncertainty	21
10. Identifying and managing the patient with significant illness	22

*This Clinical Competency Rubric is modified from the “Clinical Competency Rubric: Performance at the level of fellowship” of the Royal Australian College of General Practitioners 2024.*

# 1. Communication and consultation skills

This competency focuses on communication with patients, and the use of appropriate family medicine consultation techniques. Communication skills enable the consultation to proceed, and the demonstration of specific communication skills, especially in difficult consultations, is a requirement. Communication and the consultation should be patient-centred. The development of respectful therapeutic relationships involves empathy and sensitivity, with the doctor trying to see things from the perspective of the patient.

## Required knowledge

- Holistic approaches and perspectives

## Required attitudes

- Empathy
- Self-awareness
- Curiosity
- Professionalism
- Respect for patient autonomy

## Required skills

- Cultural understanding and responsiveness. High-level communication skills (verbal and non-verbal including de-escalation skills)
- Negotiation

**Skills focus: Verbal and written communication skills, patient-centred communication and consultation, consultation skills**

## Criteria

### Communication skills

1. Communication is appropriate to the person and the sociocultural context
2. Engages the patient to gather information about their symptoms, ideas, concerns, expectations of health care and the full impact of their illness experience on their lives
3. Matches modality of communication to patient needs, health literacy and context
4. Communicates effectively in routine and difficult situations
5. Demonstrates active listening skills
6. Uses a variety of communication techniques and materials (eg written or electronic) to adapt explanations to the needs of the patient
7. Uses appropriate strategies to motivate and assist patients in maintaining health behaviours (see 5.8)

### Consultation skills

8. Adapts the consultation to facilitate optimal patient care
9. Consults effectively in a focused manner within the time frame of a normal consultation
10. Prioritises problems, attending to both the patient's and the doctor's agendas
11. Safety-netting and specific follow-up arrangements are made

## Performance lists: 1. Communication and consultation skills

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. Communication is appropriate to the person and the sociocultural context	<ul style="list-style-type: none"> <li>• Considers and discusses the patient's socio-cultural context as part of the consultation</li> <li>• Considers the occupational aspects of the problem</li> <li>• Adapts communication style as appropriate for the patient</li> </ul>
2. Engages the patient to gather information about their symptoms, ideas, concerns, expectations of health care and the full impact of their illness experience on their lives	<ul style="list-style-type: none"> <li>• Considers and discusses the impact of the presentation on the patient's function</li> <li>• Shows empathy and respect throughout</li> <li>• Responds to verbal cues from the patient or their family Responds to non-verbal cues – this can be verbal (commenting that a patient may seem upset), or active (a change in posture, offering the patient a tissue)</li> <li>• Explores presenting problem from the patient's perspective</li> <li>• Shows a genuine curiosity to find out what the patient really thinks</li> </ul>
3. Matches modality of communication to patient needs, health literacy and context	<ul style="list-style-type: none"> <li>• Adapts language to match the patient's level of understanding</li> <li>• Uses concise, easily understood language, avoids or explains jargon</li> </ul>
4. Communicates effectively in routine and difficult situations	<ul style="list-style-type: none"> <li>• Uses silence effectively</li> <li>• Appropriate balance of closed and open questions</li> <li>• Breaks bad news sensitively</li> <li>• Has a framework for delivering bad news, such as the SPIKES model</li> <li>• Deescalates the situation when a patient is angry or agitated</li> <li>• Sensitively discusses prognosis and end-of-life decisions</li> <li>• Sensitively manages patients experiencing current or consequences of trauma</li> </ul>
5. Demonstrates active listening skills	<ul style="list-style-type: none"> <li>• Listens attentively to the patient's opening statement, without interrupting or directing patient's response</li> <li>• Listens attentively, allowing patient to complete statements without interruption and leaving space for patient to think before answering or go on after pausing</li> <li>• Confirms list and screens for further problems (eg "so that's headaches and tiredness; anything else.....?")</li> <li>• Uses open and closed questioning technique, appropriately moving from open to closed</li> <li>• Clarifies patient's statements that are unclear or need amplification (eg "Could you explain what you mean by light headed")</li> <li>• Periodically summarises to verify own understanding of what the patient has said</li> </ul>

*Continued on the next page*

## Performance lists: 1. Communication and consultation skills (continued)

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
6. Uses a variety of communication techniques and materials (eg written or electronic) to adapt explanations to the needs of the patient	<ul style="list-style-type: none"> <li>• The patient's problem is explained in such a way that they can easily understand</li> <li>• The explanation is relevant, understandable and appropriate Checks patient's understanding of information given, or plans made</li> <li>• Uses a variety of explanation techniques including images and patient handouts</li> <li>• The patient's health beliefs are taken into consideration or referenced during the explanation of the problem</li> <li>• Gives explanation at appropriate times: avoids giving advice, information or reassurance prematurely</li> <li>• Chunks and checks: gives information in manageable chunks, checks for understanding</li> <li>• Uses patient's response as a guide to how to proceed</li> </ul>
7. Uses appropriate strategies to motivate and assist patients in maintaining health behaviours	<ul style="list-style-type: none"> <li>• See 5.8</li> </ul>
8. Adapts the consultation to facilitate optimal patient care	<ul style="list-style-type: none"> <li>• Flexible in approach both with regards to what is covered in the consultation and with timing</li> <li>• Accommodates the patient's needs, including having family or other support in the consultation</li> <li>• Takes the time to let the patient tell their story</li> </ul>
9. Consults effectively in a focussed manner within the time frame of a normal consultation	<ul style="list-style-type: none"> <li>• Keeps the consultation focused with a clear structure</li> <li>• Prioritises when the patient presents with multiple issues</li> </ul>
10. Prioritises problems, attending to both the patient's and the doctor's agendas	<ul style="list-style-type: none"> <li>• Negotiates the agenda for the consultation with the patient</li> <li>• Takes account of the patient's expectations</li> <li>• Takes account of the patient's medical needs</li> </ul>
11. Safety-netting and specific follow-up arrangements are made	<ul style="list-style-type: none"> <li>• Clear follow up guidance is given to patients routinely</li> <li>• Education is provided to patients on when to seek guidance for symptom deterioration</li> <li>• Clear guidance is given to patients on how to access appropriate medical care</li> <li>• Barriers to addressing care are addressed</li> </ul>

*Continued on the next page*

## 2. Clinical information gathering and interpretation

This competency is about the gathering, interpretation and use of data or information for clinical judgement. This includes information gathered from the history, clinical records, physical examination and investigations. History-taking includes gathering information from other sources, such as family members and carers, where appropriate. Information gathering should be hypothesis-driven and used to confirm or exclude likely diagnoses and red flags. The physical examination, and the selection of appropriate and evidence-based investigations, are incorporated into this assessment area. This should be appropriate to the patient and presentation, and be evidence based.

### Required knowledge

- Critical evaluation of demographic data and health information
- Human body and disease
- Professional resources and guidelines

### Required attitudes

- Empathy
- Ability to deal with uncertainty and ambiguity
- Self-awareness
- Curiosity

### Professionalism

- Respect for patient autonomy

### Required skills

- High-level communication skills (verbal and non-verbal including de-escalation skills)
- Comprehensive history taking social, cultural and medical
- Competent physical examinations

**Skills focus: History, physical examination, investigations and how the clinical information is gathered**

### Criteria

#### History

1. A comprehensive biopsychosocial history is taken from the patient
2. All available sources of information are appropriately considered when taking a history

#### Physical examination

3. An appropriate and respectful physical examination is undertaken, targeted at the patient's presentation and likely differential diagnoses
4. Physical examination findings are detected accurately and interpreted correctly
5. Specific positive and negative findings are elicited

#### Investigations

6. Rational options for investigations are chosen using an evidence-based approach
7. Interprets investigations in the context of the patient's presentation

## Performance lists: 2. Clinical information gathering and interpretation

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. A comprehensive biopsychosocial history is taken from the patient	<ul style="list-style-type: none"> <li>Obtains sufficient information to include or exclude any likely relevant significant conditions (red flags)</li> <li>Organises the history so that it is relevant and targeted to the presenting symptoms</li> <li>Follows up on patient cues to elicit positive and negative details</li> <li>Questions that are used are relevant and focused</li> <li>Integrates a mental state assessment into history taking as appropriate</li> </ul>
2. All available sources of information are appropriately considered when taking a history	<ul style="list-style-type: none"> <li>Refers to patient's notes prior to the consultation, reviewing relevant information such as past medical history, specialists' letters</li> <li>Considers information provided by third party such as family members or carer</li> </ul>
3. An appropriate and respectful physical examination is undertaken, targeted at the patient's presentation and likely differential diagnoses	<ul style="list-style-type: none"> <li>Performs a systematic physical examination that is appropriately focused and relevant to the presentation</li> <li>Obtains consent before performing an examination</li> <li>Enquires if the patient would prefer a chaperone present when undertaking an examination that could be intimate</li> <li>Identifies potential cultural considerations, such as being of the opposite gender to the patient when gaining consent and performing examinations</li> <li>Positions the patient with consideration for their comfort, safety and modesty</li> <li>Explains the reasons for the examination and findings to the patient throughout</li> <li>Washes hands prior to performing a physical examination</li> </ul>
4. Physical examination findings are detected accurately and interpreted correctly	<ul style="list-style-type: none"> <li>Uses recognised physical examination techniques</li> <li>Uses the examination findings to confirm or exclude possible diagnoses</li> </ul>
5. Specific positive and negative findings are elicited	<ul style="list-style-type: none"> <li>Appropriately selects and uses tools to aid physical examination (eg ophthalmoscope)</li> </ul>
6. Rational options for investigations are chosen using an evidence-based approach	<ul style="list-style-type: none"> <li>Selects appropriate investigations for the patient presentation and likely diagnosis</li> <li>Selects relevant investigations in an appropriate sequence</li> <li>Considers which diagnostic tests are likely to be the most beneficial to the health of the patient</li> <li>Considers costs when requesting investigations</li> <li>Considers issues of access when requesting investigations</li> </ul>

*Continued on the next page*

## Performance lists: 2. Clinical information gathering and interpretation (continued)

<b>Criteria (competent at level of Fellowship)</b>	<b>Performs consistently at the standard expected</b>
7. Interprets investigations in the context of the patient's presentation	<ul style="list-style-type: none"><li>• Accurately interprets investigations</li><li>• Interprets investigations taking into consideration the patient's history, current presentation, and current medication</li></ul>

### 3. Diagnosis, decision-making and reasoning

This is about a conscious, structured approach to making diagnoses and decision-making. This focuses on all the steps leading up to formulating a diagnosis or problem list. This also includes diagnostic accuracy that does not necessarily require the correct diagnosis, but that the direction of reasoning was appropriate and accurate. The doctor's ability to think about and reflect on their reasoning is another aspect of this assessment domain.

#### Required knowledge

- Human body and disease
- Safe management of common and important presentations in general practice

#### Required attitudes

- Empathy
- Ability to deal with uncertainty and ambiguity
- Curiosity
- Professionalism
- Commitment to learning and development

#### Required skills

- High-level problem solving
- Critical thinking
- Comprehensive diagnostic skills
- Patient-centred and safe clinical decision making

#### Skills focus: Problem solving, decision-making, dealing with uncertainty

#### Criteria

1. Integrates and synthesises knowledge to make decisions in complex clinical situations
2. Modifies differential diagnoses based on clinical course and other data as appropriate
3. Demonstrates diagnostic accuracy; this does not require the correct diagnosis, but that the direction of reasoning was appropriate and accurate
4. Collects/reports clinical information in a hypothesis-driven manner
5. Articulates an appropriate problem definition
6. Formulates a rational list of differential diagnoses, including most likely, less likely, unlikely and cannot miss diagnoses
7. Directs evaluation and treatment towards high-priority diagnoses
8. Demonstrates metacognition (thinking about own thinking)

## Performance lists: 3. Diagnosis, decision-making and reasoning

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. Integrates and synthesises knowledge to make decisions in complex clinical situations	<ul style="list-style-type: none"> <li>• Is comfortable with the range of patients who present to the practice</li> <li>• Discusses key and differentiating features of symptoms and uses this to sort them into likely diagnoses</li> <li>• Discusses epidemiology of symptoms (who gets the disease) including demographics, risk factors</li> <li>• Considers the temporal course including the duration of the symptoms and pattern of symptoms</li> <li>• Outlines the pathophysiology of the disease</li> </ul>
2. Modifies differential diagnoses based on clinical course and other data as appropriate	<ul style="list-style-type: none"> <li>• Reviews history, progress and current status at follow up</li> <li>• Reviews discharge summaries, specialist reports</li> <li>• Reflects on feedback from the patient or others and incorporates this</li> </ul>
3. Demonstrates diagnostic accuracy; this does not require the correct diagnosis, but that the direction of reasoning was appropriate and accurate	<ul style="list-style-type: none"> <li>• Discusses patterns of disease presentation and how the pattern recognition enabled diagnostic accuracy</li> <li>• Gathers information appropriately targeted to the most likely diagnosis</li> </ul>
4. Collects/reports clinical information in a hypothesis-driven manner	<ul style="list-style-type: none"> <li>• Follows a clear line of enquiry, directing questioning and examination to specific findings likely to increase or decrease the likelihood of a specific diagnosis</li> </ul>
5. Articulates an appropriate problem definition	<ul style="list-style-type: none"> <li>• Provides a clear synopsis of the clinical problem</li> <li>• Emphasises important positive and negative findings</li> </ul>
6. Formulates a rational list of differential diagnoses, including most likely, less likely, unlikely and cannot miss diagnoses	<ul style="list-style-type: none"> <li>• Provides an accurately ranked differential diagnosis</li> <li>• Demonstrates the use of a safe diagnostic strategy</li> </ul>
7. Directs evaluation and treatment towards high-priority diagnoses	<ul style="list-style-type: none"> <li>• Defers investigations that are directed to less likely/less important diagnoses</li> <li>• Efficiently directs evaluation and treatment towards more likely and can't miss diagnoses</li> </ul>
8. Demonstrates metacognition (thinking about own thinking)	<ul style="list-style-type: none"> <li>• Can discuss factors that influenced decision-making, including any emotional or situational factors</li> </ul>

## 4. Clinical management and therapeutic reasoning

This competency concerns the management of common, serious, urgent and chronic medical conditions encountered in family medicine practice. Aspects of care beyond managing simple consultations, including management of comorbidity and uncertainty, are incorporated. The management plan is patient-centred at all times. Therapeutic reasoning includes the steps taken based on the problem list, or likely diagnosis that has been developed and is a part of the clinical reasoning process.

### Required knowledge

- Hong Kong healthcare system
- Preventive health, health promotion theory and practice
- Community and patient resources
- Safe management of common and important presentations in general practice
- Professional resources and guidelines

### Required attitudes

- Ability to deal with uncertainty and ambiguity
- Professionalism
- Respect for patient autonomy

### Required skills

- High-level problem solving
- Negotiation
- Identifying relevant evidence
- Integrating evidence into decisions and actions
- Developing management plans with patients, their family/carers and other providers
- Patient-centred and safe clinical decision making
- Safe and appropriate prescribing
- Networking
- Multidisciplinary teamwork

### Skills focus: Evidence-based management

This includes: pharmacological, no active intervention, lifestyle modification, nutrition, physical therapies, psychological approaches, surgical procedures and return-to-work planning. A patient-centred management plan is developed.

### Criteria

1. Demonstrates knowledge of common therapeutic agents, uses, dosages, adverse effects and potential drug interactions, and the ability to prescribe safely
2. Rational prescribing is undertaken
3. Monitors for medication side effects and risks of polypharmacy
4. Outlines and justifies the therapeutic options selected based on the patient's needs and the problem list identified
5. Safely prescribes restricted medications using appropriate permits
6. Non-pharmacological therapies are offered and discussed
7. A patient-centred and comprehensive management plan is developed
8. Provides effective explanations, education and choices to the patient

## Performance lists: 4. Clinical management and therapeutic reasoning

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. Demonstrates knowledge of common therapeutic agents, uses, dosages, adverse effects and potential drug interactions, and the ability to prescribe safely	<ul style="list-style-type: none"> <li>• Has extensive knowledge of commonly prescribed medications</li> <li>• Appropriately refers to prescribing guidelines</li> </ul>
2. Rational prescribing is undertaken	<ul style="list-style-type: none"> <li>• Makes safe prescribing decisions, routinely checking on drug interactions and side effects</li> <li>• Considers patients age when prescribing</li> <li>• Considers co-morbidities</li> <li>• Considers drug interactions</li> </ul>
3. Monitors for medication side effects and risks of polypharmacy	<ul style="list-style-type: none"> <li>• Plans medication reviews</li> <li>• Checks for acute and chronic side-effects</li> <li>• Has confidence in stopping or stepping down medication where this is appropriate</li> </ul>
4. Outlines and justifies the therapeutic options selected based on the patient's needs and the problem list identified	<ul style="list-style-type: none"> <li>• Discusses the therapeutic options and provides sound reasoning for this</li> </ul>
5. Safely prescribes restricted medications using appropriate permits	<ul style="list-style-type: none"> <li>• Prescribes restricted medication within the appropriate legal frameworks</li> <li>• Keeps clear and accurate records regarding rationale for prescribing</li> <li>• Has pain management plans for patients prescribed opioids in place</li> <li>• Refers appropriately to a pain management specialist</li> </ul>
6. Non-pharmacological therapies are offered and discussed	<ul style="list-style-type: none"> <li>• Discusses:</li> <li>• Lifestyle modification (SNAP)</li> <li>• Physical therapies</li> <li>• Psychological approaches</li> <li>• Surgical procedures (eg hip replacement surgery)</li> <li>• Return-to-work planning</li> </ul>
7. A patient-centred and comprehensive management plan is developed	<ul style="list-style-type: none"> <li>• Appropriate safety-netting is arranged</li> <li>• Takes into consideration patient's health literacy</li> <li>• Takes into consideration patient's social circumstances</li> <li>• Takes into consideration patient expectations</li> <li>• Negotiates an agreement on the management plan with the patient</li> </ul>
8. Provides effective explanations, education and choices to the patient	<ul style="list-style-type: none"> <li>• Discusses possible outcomes</li> <li>• Discusses uncertainties of treatment options</li> <li>• Balanced communication regarding risks vs benefits</li> </ul>

## 5. Preventive and population health

This competency is about the provision of family medicine practice care and service that supports economically rational and effective use of the healthcare system. Issues related to public health are identified and managed. The determinants of health and disease are identified both on the individual and community level. Disease prevention and health promotion activities are included in the consultation.

### Required knowledge

- Hong Kong healthcare system
- Preventive health, health promotion theory and practice
- Community and patient resources
- Access and equity in the context of the patient and the setting
- Professional resources and guidelines

### Required attitudes

- Collegiality
- Professionalism

### Required skills Communication skills

- Networking Multidisciplinary teamwork

**Skills focus: Health-promotion, community resources, public health issues, screening and prevention**

### Criteria

1. Implements screening and prevention strategies to improve outcomes for individuals at risk of common causes of morbidity and mortality
2. Uses planned and opportunistic approaches to provide screening, preventative care and health-promotion activities
3. Coordinates a team-based approach
4. Demonstrates understanding of available services in the local community
5. Current and emerging public health risks are managed appropriately
6. Educates patients and families in disease management and health-promotion skills
7. Identifies opportunities to effect positive change through health education and promotion
8. Uses appropriate strategies to motivate and assist patients in maintaining health behaviours

## Performance lists: 5. Preventive and population health

<b>Criteria (competent at level of Fellowship) Performs consistently at the standard expected</b>	
1. Implements screening and prevention strategies to improve outcomes for individuals at risk of common causes of morbidity and mortality	<ul style="list-style-type: none"> <li>Identifies specific risk factors for priority diseases</li> <li>Engages in age and risk-appropriate screening</li> <li>Follows recognised guidelines for preventive and screening activities</li> <li>Recall systems are used (cervical smears, vaccinations etc)</li> </ul>
2. Uses planned and opportunistic approaches to provide screening, preventative care and health-promotion activities	<ul style="list-style-type: none"> <li>Incorporates disease prevention and health promotion in the ongoing care of patients</li> <li>Provides opportunistic and appropriate immunisation</li> <li>Provides targeted vaccinations appropriate to the patient and the population</li> </ul>
3. Coordinates a team-based approach	<ul style="list-style-type: none"> <li>Appropriate referrals are considered and discussed</li> <li>Involves other health care practitioners in the care of the patient</li> </ul>
4. Demonstrates understanding of available services in the local community	<ul style="list-style-type: none"> <li>Discusses the local services with the patient and their family</li> <li>Assists the individual patient in negotiating obstacles to the care that they need within the community for eg aged care referrals</li> <li>Actively engages with local health care teams</li> </ul>
5. Current and emerging public health risks are managed appropriately	<ul style="list-style-type: none"> <li>Identifies and manages issues of public health concern</li> <li>Implements vaccination programs</li> <li>Is up to date with disease trends</li> <li>Is up to date with guidelines regarding screening and prevention</li> <li>Makes appropriate notifications to the Department of Health</li> <li>Assists with contact-tracing</li> </ul>
6. Educates patients and families in disease management and health-promotion skills	<ul style="list-style-type: none"> <li>Uses the consultation to provide education to the patient</li> <li>Discusses modifiable risk factors</li> <li>Provides advice on lifestyle modification</li> <li>Opportunistically checks immunisation status</li> </ul>
7. Identifies opportunities to effect positive change through health education and promotion	<ul style="list-style-type: none"> <li>Provides actionable advice on lifestyle modification</li> <li>Discusses return-to-work</li> <li>Provides information about risk of injury or illness during travel</li> <li>Undertakes harm minimisation discussion with patients with substance addictions</li> </ul>
8. Uses appropriate strategies to motivate and assist patients in maintaining health behaviours	<ul style="list-style-type: none"> <li>Identifies the patient's stage of change</li> <li>Assess the level of health literacy</li> <li>Provides information about risks of not changing</li> <li>Acknowledges the patient's perspective</li> </ul>

## 6. Professionalism

### 6.1 Professional knowledge, behaviour and attitudes

This requires knowledge of ethical principles, as well as duty-of-care and maintenance of appropriate therapeutic boundaries. The ability to appropriately review potential and actual critical incidents in order to manage consequences and reduce future risk is also an important consideration in this domain. The response to scrutiny of own professional behaviour, being open to feedback and demonstrating a willingness to change is included.

### 6.2 Learning and professional development

Being able to respond appropriately to feedback as an educational dialogue, demonstrating the ability to reflect on performance, and identifying personal learning needs are important components of this competency. Using critical appraisal skills, actively participating in clinical audits, and demonstrating a commitment to ongoing professional development all form part of this domain of assessment.

#### Required knowledge

- Knowledge of own scope of safe practice Ethical principles in medicine
- Legislation relevant to family medicine practice

#### Required attitudes

- Empathy
- Collegiality
- Self-awareness
- Professionalism
- Commitment to learning and development
- Commitment to contribute to improving the evidence base for family medicine research Respect for patient autonomy
- Commitment to self/family care

#### Required skills

- Reflective practice

#### Skills focus: Professional knowledge, attitudes and behaviours

### 6.1 Professional knowledge, behaviour and attitudes

CS4.1.1 Adherence to relevant codes and standards of ethical and professional behaviour

CS4.1.2 Duty of care is maintained

CS4.1.4 Critical incidents and potential critical incidents are identified and managed

### 6.2 Learning and professional development

CS4.2.1 Professional knowledge and skills are reviewed and developed

CS4.2.2 Reflection and self-appraisal are undertaken regularly

*Continued on the next page*

## 6. Professionalism (continued)

### Criteria

1. Encourages scrutiny of professional behaviour, is open to feedback and demonstrates a willingness to change
2. Exhibits high standards of moral and ethical behaviour towards patients, families and colleagues, including an awareness of appropriate doctor–patient boundaries
3. Appropriately manages ethical dilemmas that arise
4. Identifies and manages clinical situations where there are obstacles to the provision of duty of care
5. Implements strategies to review potential and actual critical incidents to manage consequences and reduce future risk
6. Personal health issues are identified and managed by accessing professional support as needed
7. Judges the weight of evidence, using critical appraisal skills and an understanding of basic statistical terms, to inform decision-making
8. Shows a commitment to professional development through reflection on performance and the identification of personal learning needs
9. Attends and participates in all learning and assessment activities of an educational program
10. Actively engages in feedback as a dialogue, discussing performance and setting own goals for professional development
11. Personally participates in audits and quality-improvement activities and uses these to evaluate and suggest improvements in personal and practice performance

### Performance lists: 6.1. Professional knowledge, behaviour and attitudes

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. Encourages scrutiny of professional behaviour, is open to feedback and demonstrates a willingness to change	<ul style="list-style-type: none"> <li>• Seeks feedback and engages in dialogue about professional behaviour</li> </ul>
2. Exhibits high standards of moral and ethical behaviour towards patients, families and colleagues, including an awareness of appropriate doctor–patient boundaries	<ul style="list-style-type: none"> <li>• Respects patient-doctor boundaries</li> <li>• Maintains confidentiality</li> <li>• Recognises professional limitations</li> <li>• Respects the patient's culture and values</li> <li>• Care of the patient is the primary concern</li> <li>• Practicing medicine safely at all times</li> <li>• Shows honesty at all times</li> <li>• Takes responsibility for own actions</li> <li>• Respects patient autonomy</li> <li>• Recognising unethical behaviours by colleagues</li> <li>• Managing conflicts of interest</li> </ul>

*Continued on the next page*

## Performance lists: 6.1. Professional knowledge, behaviour and attitudes (continued)

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
3. Appropriately manages ethical dilemmas that arise	<ul style="list-style-type: none"> <li>• Aware of own values and belief systems and how these may have an impact on patient care</li> <li>• Considers multiple perspectives and options available to facilitate a decision</li> <li>• Making decisions when professional and personal values diverge</li> <li>• Be able to justify the decision that is made and reflect on the outcome</li> </ul>
4. Identifies and manages clinical situations where there are obstacles to the provision of duty of care	<ul style="list-style-type: none"> <li>• Understands issues involved in contact tracing for communicable disease where the patient wishes to remain anonymous</li> <li>• Able to manage expectations of workplace stakeholders when dealing with workers compensation injuries</li> <li>• Describes how the requirements of Mandatory reporting can impact on the provision of care</li> <li>• Reviews of fitness to drive and is aware that this could impact on patient care or the therapeutic relationship</li> <li>• Manage emotionally labile situations (terminal illness, euthanasia, unwanted pregnancy)</li> <li>• Manage patient-practitioner relationships that may present a conflict of interest</li> <li>• Manage professional differences (eg criteria for referral, timeliness of intervention)</li> <li>• Caring for patients with challenging conditions and beliefs (such as poor adherence to advice, declining life sustaining therapy because of beliefs)</li> </ul>
5. Implements strategies to review potential and actual critical incidents to manage consequences and reduce future risk	<ul style="list-style-type: none"> <li>• Recognising what has happened</li> <li>• Acting immediately to rectify the problem, if possible, including seeking any necessary help and advice</li> <li>• Explaining to the patient as promptly and fully as possible what has happened and the anticipated short-term and long-term consequences</li> <li>• Acknowledging any patient distress and providing appropriate support</li> <li>• Complying with any relevant policies, procedures and reporting requirements, subject to advice from your medical indemnity insurer</li> <li>• Reviewing adverse events and implementing changes to reduce the risk of recurrence</li> <li>• Reporting adverse events to the relevant authority, as necessary</li> </ul>
6. Personal health issues are identified and managed by accessing professional support as needed	<ul style="list-style-type: none"> <li>• Identifies physical/psychological impairment which may impact wellbeing or ability to manage responsibilities, and ensures that a robust management plan is developed</li> </ul>

*Continued on the next page*

## Performance lists: 6.2. Learning and professional development

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
7. Judges the weight of evidence, using critical appraisal skills and an understanding of basic statistical terms, to inform decision-making	<ul style="list-style-type: none"> <li>• Uses critical appraisal skills in determining whether resources are applicable to a particular patient</li> </ul>
8. Shows a commitment to professional development through reflection on performance and the identification of personal learning needs	<ul style="list-style-type: none"> <li>• Reflects on clinical skills and knowledge in order to engage in a process of continuous learning</li> <li>• Reflection and self-appraisal are undertaken regularly</li> <li>• Appraise and review response to constructive feedback</li> <li>• Participating regularly in activities that maintain and further develop knowledge, skills and performance</li> <li>• Regularly reviewing continuing medical education and continuing professional development activities to ensure that they are consistent with those recommended the relevant professional organisation and regulatory authorities</li> </ul>
9. Attends and participates in all learning and assessment activities of an educational program	<ul style="list-style-type: none"> <li>• Attends learning activities as required by the program</li> <li>• Actively participates in learning activities</li> <li>• Actively participates in assessment activities</li> </ul>
10. Actively engages in feedback as a dialogue, discussing performance and setting own goals for professional development	<ul style="list-style-type: none"> <li>• Actively seeks feedback</li> <li>• Contributes to feedback by reflecting on performance</li> <li>• Identifies areas of improvement</li> </ul>
11. Personally participates in audits and quality-improvement activities and uses these to evaluate and suggest improvements in personal and practice performance	<ul style="list-style-type: none"> <li>• Undertakes a clinical audit</li> </ul>

## 7. Family medicine practice systems and regulatory requirements

This competency is about understanding family medicine practice systems - including appropriate use of administration and IT systems, the importance of effective record keeping, clinical handover and recall systems. It also requires an understanding of how primary care is organised in Hong Kong, and the statutory and regulatory requirements and guidelines that are in place. Written communication skills can be assessed in this domain when referral letters and clinical notes are reviewed. Patient consent and maintaining confidentiality are also incorporated into this domain.

### Required knowledge

- Hong Kong healthcare system
- Legislation relevant to family medicine practice
- Professional resources and guidelines

### Required attitudes

- Professionalism

### Required skills

- Setting and up working with practice systems

**Skills focus: Medical records, certification and legal requirements, recall systems, computer use, infection control**

### Criteria

1. Appropriately uses the computer/IT systems to improve patient care in the consultation
2. Maintains comprehensive and accurate clinical notes
3. Written communication is clear, unambiguous and appropriate to the task
4. Demonstrates efficient use of recall systems to optimise health outcomes
5. Accurately completes legal documentation appropriate to the situation
6. Implements best-practice guidelines for infection control measures
7. Patient confidentiality is managed appropriately
8. Informed consent is explained and obtained

## Performance lists: 7. Family medicine practice systems and regulatory requirements

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. Appropriately uses the computer/IT systems to improve patient care in the consultation	<ul style="list-style-type: none"> <li>• Uses the computer effectively during the consultation without this interfering with patient communication</li> <li>• Uses the IT systems available to access recall systems, relevant patient data</li> </ul>
2. Maintains comprehensive and accurate clinical notes	<ul style="list-style-type: none"> <li>• Records are timely and accurate</li> <li>• Patient notes are up to date, clear and accurate</li> <li>• Clear and precise documentation of diagnosis in patient notes</li> <li>• Clear and precise documentation of management and follow up plans</li> </ul>
3. Written communication is clear, unambiguous and appropriate to the task	<ul style="list-style-type: none"> <li>• Referral letters are legible, and clearly state the purpose of the referral</li> <li>• Instructions to the patient are legible, in language that the patient can understand</li> </ul>
4. Demonstrates efficient use of recall systems to optimise health outcomes	<ul style="list-style-type: none"> <li>• Uses a recall system to ensure appropriate follow up of patient results</li> <li>• Uses a follow up system to ensure appropriate follow up of agreed management steps</li> <li>• Describes the systems used to identify and notify individuals in need of follow up</li> </ul>
5. Accurately completes legal documentation appropriate to the situation	<ul style="list-style-type: none"> <li>• Describes the legal requirements when undertaking assessment and reporting of fitness to drive</li> <li>• Describes the legal requirements when undertaking work capacity certificates</li> <li>• Describes the considerations of work capacity certificates</li> <li>• Describes the legal requirements and considerations of death certification</li> <li>• Describes mandatory reporting requirements</li> <li>• Describes incident reporting for quality improvement within the practice</li> <li>• Manages capacity assessment and certification</li> </ul>
6. Implements best-practice guidelines for infection control measures	<ul style="list-style-type: none"> <li>• Regular practice of appropriate hand hygiene</li> <li>• Can discuss body fluid spills management Immunisation of self and staff</li> </ul>

*Continued on the next page*

## Performance lists: 7. Family medicine practice systems and regulatory requirements (continued)

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
7. Patient confidentiality is managed appropriately	<ul style="list-style-type: none"> <li>• Keeps information identifiable to an individual private</li> <li>• Manages exceptions to this obligation such as when there is a legal subpoena or requirements for mandatory reporting</li> <li>• Describes situations when there is an exception to patient confidentiality requirements</li> </ul>
8. Informed consent is explained and obtained	<ul style="list-style-type: none"> <li>• Provides accurate and comprehensive information tailored to the individual, the options available and the risks and benefits of these options</li> <li>• Gains consent for physical examination, procedures, management plans and to have a third- party present in the room for educational purposes</li> <li>• Describes how capacity to provide consent is determined</li> </ul>

## 8. Procedural skills

Appropriate procedures are those which are likely to be most beneficial to the individual's health and wellbeing from a diagnostic and/or management perspective. Assessment of the appropriate nature of procedures is inherently related to the practice setting, individual sociocultural context and consequent availability of access to more specialised services. Recommendations for procedures should consider the potential benefits, consider the evidence basis and the possible risks and costs in the context of any relevant sociocultural beliefs of the individual. The individual doctor should be able to demonstrate a range of procedures appropriate for general practice. Consideration is given to the skills that need to be developed, with specific consideration of the local community or practice population needs.

### Criteria

1. Demonstrates a wide range of procedural skills to a high standard and as appropriate to the community requirements
2. Refers appropriately when a procedure is outside their level of competence

### Performance lists: 8. Procedural skills

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. Demonstrates a wide range of procedural skills to a high standard and as appropriate to the community requirements	<ul style="list-style-type: none"> <li>• Competently selects the correct procedure based on the patient's need and context</li> <li>• Safely performs the procedure using strict infection control standards</li> <li>• Obtains informed consent prior to undertaking the procedure</li> <li>• Documents informed consent for procedures</li> <li>• Accurately documents what took place during the procedure</li> <li>• After care is discussed and agreed with the patient</li> </ul>
2. Refers appropriately when a procedure is outside their level of competence	<ul style="list-style-type: none"> <li>• Recognises when unable to safely perform a procedure</li> <li>• Has referral pathways that enable referrals</li> </ul>

## 9. Managing uncertainty

Ongoing undifferentiated conditions can cause considerable anxiety for patients, their families and the family physician. There is a need for a structured, evidence-based approach in order to minimise risk from health and economic perspectives. Undifferentiated conditions are often associated with uncertainty and ambiguity, and present management challenges for the clinician. Clinical decision-making around choices of investigations need to be rational and balance the potential risks of both over and under investigating and management, against the benefits in the context of the individual.

### Criteria

1. Manages the uncertainty of ongoing undifferentiated conditions
2. Addresses problems that present early and/or in an undifferentiated way by integrating all the available information to help generate differential diagnoses
3. Recognises when to act and when to defer doing so, and uses time as a diagnostic tool

### Performance lists: 9. Managing uncertainty

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. Manages the uncertainty of ongoing undifferentiated conditions	<ul style="list-style-type: none"> <li>• Excludes serious or red flag conditions</li> <li>• Formulates a management plan in the absence of a diagnosis</li> <li>• Refrains from treatment whenever this is applicable (watchful waiting)</li> <li>• Makes rational and evidence-based choices of investigations</li> <li>• Arranges appropriate review</li> </ul>
2. Addresses problems that present early and/or in an undifferentiated way by integrating all the available information to help generate differential diagnoses	<ul style="list-style-type: none"> <li>• Discusses key and differentiating features of symptoms and uses this to sort them into likely diagnoses</li> <li>• Gathers information appropriately targeted to the most likely diagnosis</li> <li>• Considers the temporal course including the duration of the symptoms and pattern of symptoms</li> <li>• Demonstrates the use of a safe diagnostic strategy</li> </ul>
3. Recognises when to act and when to defer doing so, and uses time as a diagnostic tool	<ul style="list-style-type: none"> <li>• Avoids intervention when no clinical justification</li> <li>• Arranges appropriate review</li> <li>• Aware of normal course of disease</li> </ul>

## 10. Identifying and managing the patient with significant illness

A patient with significant illness is an individual at any life stage who is at risk of actual or acute potentially life-threatening health problems. Family physicians are required to identify significant illness early and manage this in line with accepted guidelines.

### Criteria

1. A patient with significant illness is identified
2. Has confidence in, and takes ownership of, own decisions while being aware of own limitations

### Performance lists: 10. Identifying and managing the patient with significant illness

Criteria (competent at level of Fellowship)	Performs consistently at the standard expected
1. A patient with significant illness is identified	<ul style="list-style-type: none"> <li>• Correctly identifies actual or potentially life-threatening health problems.</li> </ul>
2. Has confidence in, and takes ownership of, own decisions while being aware of own limitations	<ul style="list-style-type: none"> <li>• Reflects on clinical skills and knowledge in order to engage in a process of continuous learning</li> <li>• Identifies areas of improvement</li> <li>• Recognises professional limitations</li> <li>• Takes responsibility for own actions</li> </ul>
